THE TONE

Warm, human and honest — like explaining something to a friend, not reading ad copy. No hype, no hard sell. The sentences are short because they are spoken, not read. Let them breathe.

READING NOTES

Each line is timed to what happens on screen. The duration on the left is how long that line has in the picture — treat it as a target, not a cage. The gaps between lines are real silence in the cut; you do not need to fill them.
